Gateway Firmware Upgrades: **BacNet-GW-3 / Modbus-GW-3 / NWS-3 & Vesda-HLI-GW**

NOTIFIER is pleased to announce the release of the following firmware upgrades:

NOTIFIER has released **BacNet-GW-3 V3.28 B104** firmware. The BacNet Gateway provides a BacNet interface from a Noti·Fire·Net™ to BMS system etc.

NOTIFIER has released **Modbus-GW-3 V3.28 B106** firmware, which provides a communication link between the AFP-2800 or AFP-3030 fire alarm control panels and other networks that use the Modbus/TCP communication protocol.

NOTIFIER has released **NWS-3 Gateway V3.28 B108** firmware, which provides a web server functionality to remotely monitor the status of all devices on a Noti·Fire·Net™ from any computer using an internet browser.

NOTIFIER has released **Vesda-HLI Gateway V3.28 B104** firmware, which provides a communication link between the Noti·Fire·Net™ network and the Xtralis™ VESDAnet network.

These new releases mainly include updates related to the AFP-3030 release. They are required for any site which incorporates AFP-3030 panels. They also rectify other known issues and include support for upcoming product releases.

Compatibility:

The minimum software versions required for the network interface cards on a NOTI-FIRE-NET is NCM-W/F Version 3.060.006

Please contact your NOTIFIER technical support for any technical questions.
